

Zapamiętaj

Suma miar kątów dowolnego trójkąta wynosi **zawsze** 180° .

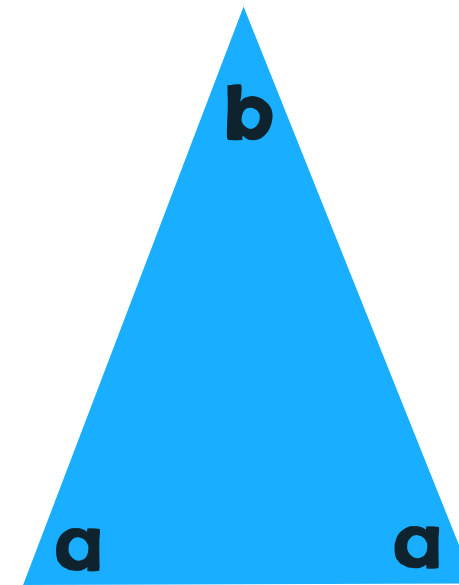

$$\sphericalangle a + \sphericalangle b + \sphericalangle c = 180^\circ$$

$$90^\circ + \sphericalangle a + \sphericalangle b = 180^\circ$$

$$\sphericalangle a + \sphericalangle b = 90^\circ$$

$$\sphericalangle a + \sphericalangle a + \sphericalangle b = 180^\circ$$
